

## A strategic assessment of Asian Pacific biomass demand and supply to 2030

Table of contents and lists of figures & tables

HAWKINS WRIGHT

# Table of contents

<b>Executive summary .....</b>	<b>vii</b>
<b>1. Electricity generation in East Asia .....</b>	<b>1</b>
Electricity generation trends in East Asia.....	2
The changing structure of Japan's electricity sector.....	3
Japan's Strategic Energy Plan, 2014.....	4
Japan's planned energy mix in 2030.....	5
South Korea: Trends in electricity generation.....	6
Planned changes to South Korea's generation mix to 2030.....	7
<b>2. Policy instruments .....</b>	<b>9</b>
Policy drivers in Japan – Feed-in Tariff (FIT).....	10
Policy drivers in Japan - GHG emission reduction & renewables targets.....	12
Policy drivers in South Korea - Renewable Portfolio Standard.....	13
Policy drivers in South Korea - carbon trading scheme.....	14
Policy drivers in China .....	15
Biomass paying capability .....	17
Biomass paying capability: Japanese dedicated biomass power .....	18
Biomass paying capability: Japanese biomass cofiring indifference price .....	19
Biomass paying capability: South Korea dedicated biomass power .....	20
Biomass paying capability: South Korean biomass cofiring indifference price .....	21
<b>3. The pipeline of biomass power projects.....</b>	<b>23</b>
The requirements and procurement approaches of Asian biomass buyers .....	24
Map of operational biomass power projects in Japan ≥49MW .....	26
Map of planned biomass power projects in Japan ≥49MW .....	27
Biomass power project developers in Japan.....	28
Operational dedicated biomass power plants (>20MW) in Japan .....	32
Operational biomass cofiring plants in Japan .....	33
Planned dedicated biomass plants in Japan (≥49MW) .....	34
Planned biomass cofiring plants in Japan (≥49MW).....	35
Map of biomass power projects in South Korea .....	36
Biomass power project developers in South Korea .....	37
Operational biomass power plants in South Korea .....	40
Biomass power plants under construction or planned in South Korea .....	41
Biomass power developers in China .....	42
Biomass power demand in China .....	43
<b>4. Forecasts of biomass demand to 2030 .....</b>	<b>45</b>
Summary of historic and planned biomass demand in Japan and Korea .....	46

## Table of contents

Planned biomass demand in Japan to 2030 .....	47
Planned biomass demand in South Korea to 2030 .....	48
Forecast of biomass demand in Japan and South Korea to 2030 .....	49
<b>5. Biomass availability and feedstock supply.....</b>	<b>51</b>
Summary of biomass resources used and potentially available for the north east Asian market .....	52
Introduction to biomass supply .....	53
Global overview of wood fibre resources .....	54
Forest resources, inventories and removals in the United States.....	55
Forest resources in the United State: the impact of the changing age class distribution.....	56
Forest resources in the United States: regional variations in wood fibre availability and prices.....	57
Forest resources in the United States: summary statistics .....	58
Forest resources in Canada.....	59
Forest resources and competing industries in Canada .....	60
Forest resources in Russia.....	61
Forest and other biomass resources in China.....	62
Forest resources in Vietnam .....	64
Wood processing residues in Vietnam.....	65
Forest resources in South Korea .....	66
Forest resources in Japan.....	67
Forest resources and rubberwood supply in Thailand.....	68
Forest resources and competing industries in Indonesia .....	69
Forest resources in Australia.....	70
Wood processing residues in Australia .....	72
Introduction to wood pellet supply .....	73
Wood pellet supply; the main producing regions: Vietnam .....	74
Wood pellet supply; the main producing regions: Thailand .....	75
Wood pellet supply; the main producing regions: Malaysia, Indonesia, Philippines, Australia.....	76
Wood pellet supply; the main producing regions: Russia.....	77
Wood pellet supply; the main producing regions: South Korea, China, Canada.....	78
Wood pellet supply - summary of North American capacity.....	79
Wood pellet supply, the main producing regions: The United States.....	80
Wood pellet supply, the main producing regions: Europe and the Rest of the World.....	81
Black pellets - market overview .....	82
Introduction to woodchip supply.....	83
Woodchip supply - Vietnam.....	84
Woodchip supply - Australia .....	85
Woodchip supply - other exporting countries .....	86
Introduction to palm kernel shells (PKS).....	87
Palm Kernel Shells (PKS) and other oil palm residues.....	88
The market for palm kernel shells (PKS) .....	89
Agricultural residues and unconventional biomass - palm oil by-products .....	94

Agricultural residues and unconventional biomass .....	96
<b>6. Competitive advantage and disadvantage of different feedstocks and sources.....</b>	<b>99</b>
Comparison of biomass fuel characteristics .....	100
The physical and chemical attributes of different biomass fuels .....	101
Long and short run costs of biomass supply to north east Asia .....	102
Drivers of cost competitiveness – industrial wood pellets .....	103
Wood pellet supply cost curves, all suppliers, CIF Japan .....	105
Wood pellet supply cost curves, bankable suppliers, CIF Japan .....	106
Trends in the delivered prices of industrial pellets to Japan and South Korea .....	107
Drivers of cost competitiveness – wood chips.....	108
Trends in the delivered prices of wood chips to Japan and South Korea.....	109
Drivers of cost competitiveness – PKS cost drivers and price trends.....	110
Comparison of delivered prices of chips, pellet and PKS (on an energy basis).....	111
Sustainability and supply chain GHG emissions.....	112
<b>7. Constraints and risks for buyers, suppliers and investors.....</b>	<b>115</b>
Constraints and risks for buyers, suppliers and investors .....	116
<b>Appendices .....</b>	<b>121</b>
Glossary .....	122

## Lists of figures

Figure 1: Electricity generation in Japan, South Korea and China, 1985-2016	<a href="#">2</a>	Figure 43: Exports of hardwood pulp chips to Asia, by origin, 2006-2016	<a href="#">83</a>
Figure 2: Japan: Electricity generation by fuel/technology	<a href="#">3</a>	Figure 44: Map of Vietnamese chip ports	<a href="#">84</a>
